Oluwaseyi Aina

Software Developer

Lagos, Nigeria | +234-906-073-1501 | ainaseyim@gmail.com | LinkedIn | GitHub | Certifications

PROFESSIONAL SUMMARY

- Impact-driven Software Developer with hands-on experience building and deploying full-stack MERN applications, multitenant SaaS platforms, and secure REST APIs.
- Proven ability to design and implement complex backend systems, including five-tier role-based access control, JWT authentication, Cloudinary integration, and real-time stock audit logging in production environments.
- Collaborative team player with Agile experience, actively deepening expertise in TypeScript, PostgreSQL, Linux and cloud deployment to grow into a well-rounded software engineer.

EDUCATION

Bachelor of Science (BSc), Physics
Lagos State University | July 2022 – September 2025 | Lagos, Nigeria

Backend Development Bootcamp
TS Academy | February 2026 – May 2026 | Lagos, Nigeria

CERTIFICATIONS

- Microsoft Certified: GitHub Foundations (January 2026)
- Alison Certified: Ruby Intermediate (November 2025)

CORE COMPETENCIES

Backend Development: Node.js, Express.js, REST API Design, MVC Architecture, JWT, RBAC, Multitenant SaaS
Frontend: React, Next.js, Vite, Tailwind CSS, HTML5, CSS3, JavaScript
Databases: MongoDB, Mongoose, PostgreSQL
Cloud & DevOps: Cloudinary, Render, Vercel, Nodemailer
Tools & Workflow: Git, GitHub, Postman, Linux CLI, Agile/Scrum, Code Reviews
Languages: JavaScript, Ruby, HTML, CSS

PROFESSIONAL EXPERIENCE

Technical Support
DVWorkers | 2026 – Present | Lagos, Nigeria

- Technical support for a Lagos blue-collar job marketplace startup, learning the system architecture, hosting and codebase from the platform development team.
- Resolving bugs, maintaining technical documentation and monitoring AWS infrastructure usage.

Project Engineer (Intern)
Obitech Nig Ltd | July 2024 – November 2024 | Lagos, Nigeria

- Assisted senior engineers with project requirements, planning and material/equipment estimations.
- Supported cross-functional coordination and documentation on active engineering projects.

PROJECTS

Seyi Inventory System
Personal Project — Deployed | 2025 | seyi-inventory-system.vercel.app

- Built a full-stack MERN inventory and order management platform with a five-tier RBAC system covering Admin, Manager, Staff, Auditor, and Viewer roles.
- Implemented product CRUD with Cloudinary image uploads, cart system, order flow with real-time stock validation, and audit logging for all stock movements.
- Deployed frontend on Vercel and backend on Render; integrated Nodemailer for transactional email notifications.
- Tech: Node.js, Express, MongoDB, JWT, Cloudinary, Nodemailer, React, Render, Vercel

Multitenant CBT Platform
TS Academy — Group Capstone Project | 2026 | Collaborative

- Built the Candidate Management module in a seven-person team, bulk registration, group administration, and strict tenant data isolation via tenantId indexing.
- Contributed backend services, controllers, and routes; collaborated through Agile sprint cycles, code reviews, and Git workflows.
- Tech: Node.js, Express, MongoDB, GitHub
